Scientific Project - WiFiCars

Date: 9 may 2018, 13:45

Location: CGB- US213

Present:

president:

Asif Wasefi

Reporter:

Satish Singh

Present people:

Satish Singh

Asif Wasefi

Daniel Smetankin

Ali Amir

Gauthier DB

Absent people:

None

Agenda

1. Previous paper check [2/05/2018]
2. Progress of the project
3. Necessary adjustments
4. Correction of the planning
5. Appointments for next week
6. Appointing of next weeks details

1. Previous paper check

Is correct.

2. Progress of the project

The cars are analog configured with mistakes that have to be taken out. We mounted everything on the car and now it is just testing software to get the correct "brake".

The software had been written to the point it had to be tested on cars.

3. Necessary Adjustments

Getting the cars to work without any power coming from externally placed batteries. They will have to be fully autonomous today.

4. Correcting of the planning

The reports are set

5. Appointments for next week

Daniel: Buy cables and breadboard for car. Fix the poster.

Ali: Missing reports have to be fixed. (all administration has to be done)

Asif: will write a program to manipulate the data received.

Complete project report.

Gauthier: Program, sonar

Ali: Analog mapping.

Satish: Introduction(main goal), porting to future.

Asif: Server and networking

Daniel: H-bridge, development and design

Everyone will check THEIR experiments.

6. Appointing of next weeks details

Date of the next sitting: 16/05/2018

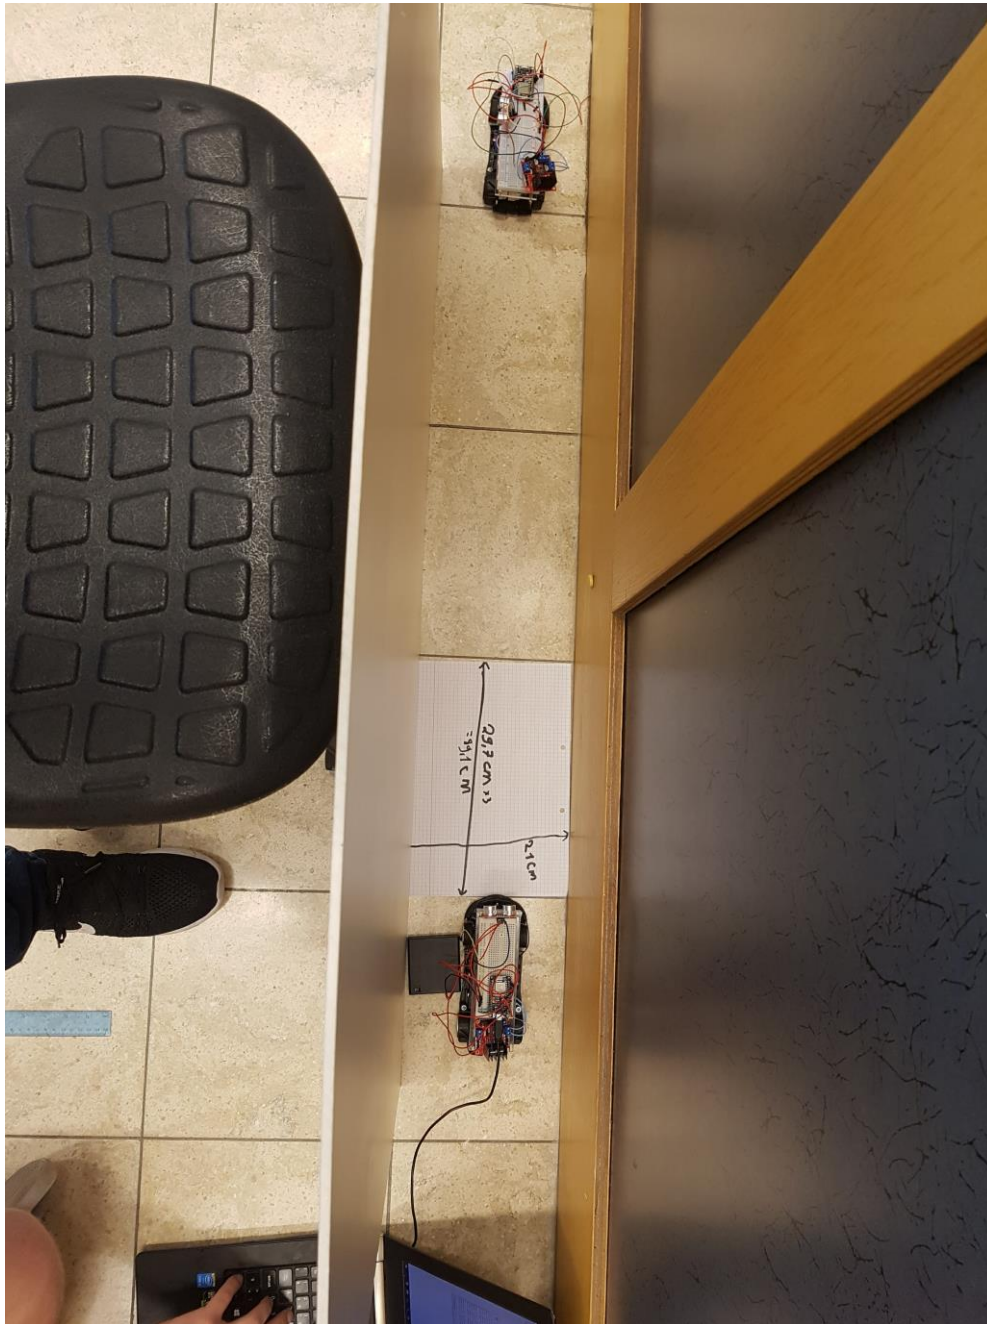

CEO : Ali Amir

Secretary : Asif Wasefi

7.Varia

There is one full functional car. The hardware is fully developed. We have to test and adjust software accordingly.

We tested our distance and we got a relative accurate measure.

The boss ends this weeks appointment and invites everyone to next weeks !
